Sounds great! Do let me know if you have any feedback on the content in the course. Teaching languages from scratch is far more challenging for me personally than doing the intermediate/advanced level courses I usually do.

I have so thoroughly enjoyed your courses on React/Redux, Webpack, and several other topics, and have been disappointed in the offerings I have previously come across for the Go language, so I I thrilled that you have applied your talents to this language - one that seems to be very quickly up-and-coming.
